
Summary

DEEPA P Fresher in developing web and mobile application. She is quite familiar with developing applications following Scrum based methodology. She is very thorough in her technical and analytical skills also a quick learner.

Skill Summary

- Programming languages: JAVA
- Database: e.g.: MySQL.
- Testing: Manual Testing
- Automation Testing with Selenium

Projects details

Solar Inverter with Battery Management:

Jul 2021 – Jun 2022

The main objective of our project is to design and construct a PV based system that produces electric energy and operates in dual mode, supplying stand-alone AC loads, while minimizing its cost and size. The system main property is to production of quality electricity from a renewable source to reduce dependence on fossil fuels and the associated emissions of pollutants. Our goal is to design and develop an inverter that will handle the task described.

Role : Testing

Responsibilities:

- Project Management

Machine LEARNING ON Python TCR Innovation

Dec 2018 - Jan 2019

Basics of Python and OOPS Concepts in Python

Role : Intern

Education

- Bachelor of Technology (BTech) in Electrical & Electronics Engineering from BMS Institute of Technology & Management. [VTU]

Certifications

- Provisional Degree Certificate
- Provisional Diploma Certificate
